

**AGFEO System Headset 9120 - Freedom of Movement away from the desk**

**AGFEO 9120 System Headset – This revolutionary DECT-GAP cordless headset has been specially adapted to be used directly with an AGFEO DECT SO Base Unit. This will offer total mobility with an unrivalled talktime.**

The combination of the AGFEO DECT solution and the stylish design of the headset offers all the freedom of movement for a professional application in a modern office environment. As you can answer calls directly from your headset you will always be available, even if you are away from your desk.

Choose the style of headset which will be most comfortable to you. The AGFEO System Headset comes with a headband or an 'Hair Style Friendly' over the ear hook .

**Total Freedom**

Make telephone calls wherever you are. Walk around the office, speak to colleagues and search through files – irrespective where you are. The AGFEO System Headset has a permanent connection to the DECT SO Base or Repeater therefore giving you unrestricted access from wherever you might be.

**Total Flexibility**

You could be in a meeting in the conference room on the third floor and have to make an urgent call. To make this call from your headset there is no need to return to your own extension, you simply can use your colleagues system phone.

**Supplied with Headband and Ear Hook.**
